Polimex Energetyka with the best proposal for Pomorzany Power Plant

07/22/2016

The proposal of Polimex Energetyka, a company within the Polimex-Mostostal Capital Group, submitted in a consortium with Doosan Lentjes GmbH for the construction of the semi-dry flue gas desulfurization plant together with the dry ash distribution system in the turnkey formula at Pomorzany Power Plant was selected in the tender as the most advantageous proposal.

Polimex Energetyka received a notice from PGE GiEK Zespół Elektrowni Dolna Odra about the selection of its proposal as the most advantageous one. The value of the proposal amounts to PLN 97 million net.

The system will operate for the needs of two once-through Benson boilers with a with a nominal flue gas flow capacity of approx. 270,000 Nm3/h, installed at Power Units A and B of the Power Plant. The project is planned to be completed by September 2019.
