Polimex Power Industry has a contract for EdF

12/17/2014

Polimex Power Industry has won the tender procedure for the renovation of the boiler for EdF Poland SA, branch in Rybnik.

Polimex Power Industry shall perform the repair of the K-4 boiler and the elements of it: the installation of fire burners, dust ducts, air ducts, air fans, exhaust fans and slag traps.

The contract value is PLN 18.55 million net. The contract with EdF will be signed later this month.

–Prefabrication shall start immediately, entering the building site is scheduled for February next year - Jacek Czerwonka says, the President of Polimex Power Industry.

Polimex Power Industry is one of the new companies of Polimex-Mostostal, it acquires new energy projects, orders for modern installations in the field of environmental protection and installation services. It also participates in the implementation of the Group's strategic contract, i.e. the Power Plant in Kozienice.

Polimex-Mostostal SA has transformed its organizational structure. The effect is a holding company, Polimex-Mostostal. Two new companies have been separated from Polimex-Mostostal SA, they shall continue the PxM operations. Polimex Power Industry operates in the energy sector, and Naftoremont-Naftobudowa in the chemical and petrochemical industry.

Energy Segment All and any of the competences of the Power Industry segment are now with the new company. Polimex Power Industry has all of the existing PxM resources available, including equipment and the design competence base, as well as references of Polimex-Mostostal SA
