Polimex-Mostostal to build the city stadium of Wisła Kraków for over 118 million PLN.

01/29/2009

Today, that is on 29 January 2009, Polimex-Mostostal S.A. has signed with Kraków Municipality, Municipal Infrastructure and Transport Board in Kraków a contract for over 118 million PLN net regarding reconstruction of city stadium of Wisła Kraków.

Within the contract Polimex-Mostostal will build the eastern stand of the stadium together with the corners, tear down the existing western stand and construct the diaphragm wall by the western stand.

The scope of works within the contract will end by December 2009.

Net value of the contract amounts to 118,211,104.21 PLN.

The Wisła stadium is another important Euro 2012 sport building realized by Polimex. In November 2008 we signed a contract for 375 million PLN net for the construction of Legia football stadium in Warsaw, which is executed according to the plan.

Both contracts confirm a very good condition of Polimex-Mostostal and its capability to realize complicated investments in short time. – informs Konrad Jaskóła - President of the Management Board, General Director of Polimex-Mostostal.

We have also submitted the best bid for the construction of the western stand of Wisła stadium. We expect to sign that contract too – adds President Jaskóła.
